

AUG 19 1999 0287

14th August 99.

Dear Mr. Snow,

This letter is to oppose the revised Calfed plan. The plan to raise Shasta dam would flood segments & the upper Sacramento and McCloud rivers. The proposed sites offstream storage reservoir would need huge water diversions from the Sacramento river. Calfed should expand water efficiency, conservation and reclamation programs instead of building new dams and canals. This could be achieved by switching to higher value & less water consuming crops and by installing water meters for all agricultural & urban users.

I support Calfed's proposed restoration goals for the central valley.

Thank you for your time & consideration
sincerely,

Jean Moran
